

YAUSS WHITEPAPER

Yamauss Token (YAUSS)

Parent Company: WISAT SARLU

The Golden Ethereum Community Token

1. Executive Summary

YAUSS is a decentralized digital asset built on the Ethereum-compatible blockchain (EVM). The project aims to develop a transparent, scalable, and community-driven ecosystem that enables users to participate in decentralized finance (DeFi), digital payments, and Web3 applications.

2. Project Vision

The vision of YAUSS is to contribute to the evolution of decentralized financial systems through transparency, security, accessibility and community participation.

3. Token Overview

Token Name: Yamauss | Symbol: YAUSS | Standard: ERC-20 | Decimals: 18 | Network: Ethereum / EVM Compatible.

4. Token Supply & Distribution

Initial Supply: 1,000,000,000 YAUSS. Maximum Supply: 100,000,000,000 YAUSS. Allocation includes public distribution, development, ecosystem growth, marketing and reserve funds.

5. Core Utilities

Peer-to-peer payments, DEX trading, DeFi participation, Web3 services and future DAO governance.

6. Technology Framework

ERC-20 compliant smart contracts, MetaMask and Trust Wallet compatibility, audit-ready architecture and Layer-2 integration potential.

7. Roadmap

Foundation, Market Expansion and Ecosystem Development phases including staking, governance and partnerships.

8. Security & Risk Management

Auditability, optional ownership renouncement, anti-bot mechanisms and liquidity protection measures.

9. Legal Disclaimer

YAUSS is a utility-focused decentralized digital asset and does not represent ownership or financial guarantees.

10. Conclusion

YAUSS aims to build a transparent, scalable and community-driven Web3 ecosystem focused on long-term utility and adoption.
